# TOWN OF LEMPSTER EXCAVATION APPLICATION CHECKLIST

**Lempster Excavation Regulations: Section XV: Application Submission Items**

The applicant shall submit at least 5 copies of an Excavation and a Reclamation Plan; one copy shall be sent to the Lempster Conservation Commission. The plans shall be at a scale appropriate for the land area involved. The Board may, upon good cause shown, waive any of the items in Paragraphs A or B.

**A. Excavation Plan**

The excavation plan shall address specific actions to be taken on the site relative to fuel and chemical handling and storage, dust control, traffic, noise control and abatement, and comprehensive site safety of unauthorized persons. The plan shall show or be accompanied by the following items:

**SUBMITTED**

Yes

- |     |     |                                                                                                                                                                                                                             |
|-----|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ___ | ___ | 1) Name and address of the owner, the excavator (if different) and all abutters.                                                                                                                                            |
| ___ | ___ | 2) Name, address, and signature of the person preparing the plan; date, bar scale                                                                                                                                           |
| ___ | ___ | 3) Sketch and description of the location and boundaries of the proposed and any existing excavations; the area in square feet and acres.                                                                                   |
| ___ | ___ | 4) The location of existing buildings, structures, septic systems and wells within 200 feet of the boundary.                                                                                                                |
| ___ | ___ | 5) Public streets, driveways, intersections, rights-of-way, and all easements within 200 feet; road network to be affected; intended transportation routes to be used.                                                      |
| ___ | ___ | 6) Topography at contour intervals of five feet or less.                                                                                                                                                                    |
| ___ | ___ | 7) All surface drainage patterns including wetlands and standing water.                                                                                                                                                     |
| ___ | ___ | 8) Sketch and description of existing and proposed access roads, including width and surface materials.                                                                                                                     |
| ___ | ___ | 9) The breadth, depth and slope of the proposed excavation and the estimated duration of the project.                                                                                                                       |
| ___ | ___ | 10) The elevation of the highest annual average groundwater table within or next to the proposed excavation.                                                                                                                |
| ___ | ___ | 11) Test pits that extend to either the seasonal high water table, ledge, or a minimum of six feet below the maximum proposed excavation depth, including location and soils data; boring logs may be submitted separately. |
| ___ | ___ | 12) Proposed fencing, buffers or other visual barriers, including height and materials.                                                                                                                                     |
| ___ | ___ | 13) All measures to control erosion, sedimentation, water pollution, air pollution, and any hazards to human safety.                                                                                                        |
| ___ | ___ | 14) Plans for stormwater management.                                                                                                                                                                                        |
| ___ | ___ | 15) Plans for equipment maintenance.                                                                                                                                                                                        |
| ___ | ___ | 16) Methods to prevent materials from the site from being tracked onto public roadways.                                                                                                                                     |
| ___ | ___ | 17) Copies of all necessary state and federal permits.                                                                                                                                                                      |

**B. Reclamation Plan**

The reclamation plan shall address the effects of the proposed excavation on soil, surface water and groundwater, vegetation, overburden, topography, and fill material, and should address future land use consistent with the Master Plan. The plan shall show or be accompanied by the following items:

- \_\_\_\_ \_\_\_\_ Name, address, and signature of the person preparing the plan; date, bar scale and north arrow.
- \_\_\_\_ \_\_\_\_ All boundaries of the area proposed for reclamation and the land within 200 feet of the boundary of this site.
- \_\_\_\_ \_\_\_\_ Final topography of the area proposed for reclamation, at contour intervals of five feet or less.
- \_\_\_\_ \_\_\_\_ Final surface drainage pattern, including the location and physical characteristics of all artificial and/or modified drainage facilities.
- \_\_\_\_ \_\_\_\_ Timetable as to fully-depleted sites within the excavation area.
- \_\_\_\_ \_\_\_\_ Schedule of final reclamation activities including seeding mixtures, cover vegetation, fertilizer types, and application rates.
